**Re: TR020316#1SJ  
Twin Block Use**

Wednesday, 02 March 2016

The new Kratos Sharp Edge Mini-Blocks can be used as in a twin block arrangement in combination with the special new attachment device. However please note that the use of these blocks has some restrictions to ensure that the load applied to the user is kept below the legal requirement of 6kN.

1. Fall Factor 2
  - a. For any use of the block where the anchorage point is below the D-Ring on the harness where the blocks are attached, only one of the blocks is allowed to be anchored at any one time.
2. Fall Factor <2
  - a. Where the anchorage point is level with or higher than the D-Ring on the harness where the blocks are attached then the two blocks may be anchored at the same time.

Products covered:

- FA 20 502 02 – 2m sharp edge block with small hook
- FA 20 503 02 – 2m sharp edge block with Scaffold Hooks
- FA 20 502 00 B – Twin retractable block connection device
