

Guard Angel

GUARD RAIL PROTECTION SYSTEM

Product Details

Range Guard Angel

Type Edge Protection System

Product Overview

Modular, pre-galvanised steel guardrail safety system.

Suitable for installation and use on new and existing buildings with working platforms, roofs or technical terraces having slopes between 0° and 30° and no public access. A foldable option is available.

Designed for compatibility with most roofing systems

Product Application

Suitable for all Kingspan roof types including standing seam, composite, built up, secret fix, trapezoidal and membrane roofs.

System Configuration

The Guard Angel system can be configured to any requirement.
