FALL PROTECTION SOLUTIONS

by  **BETTERSAFE**
INTERNATIONAL

Kingspan Compatible
Fall Protection
Solutions.

Fall Protection. It's what we do. It's how we do it that is different.

At Bettersafe International we are specialists in working at height. Nothing else. No dilution, no separation, no compromise. We offer high quality, industry leading Fall Protection Equipment.

The way in which we work is different. Our commitment to our clients and the users of our products is centralised around a set of core values.

Doing Fall Protection Differently.

Kingspan Compatible
Fall Protection
Solutions.

Who is Bettersafe International?

We are specialists in working at height. Nothing else. No dilution, no separation, no compromise.

With over 40 years of experience within our walls we offer our partners high quality, industry leading fall protection equipment and unique solutions. Couple this with extensive training courses, exceptional quotation and technical support, and a very rapid response to required solutions, you have a winning formula to partner with.

What does Bettersafe International do?

Fall protection. It's what we do at Bettersafe International. It's how we do it that is different.

Unlike the majority of suppliers our single focus is ensuring that you get the product you need when you need it. This is done through large stocks and an open ear. We are relaxed and responsive, we always answer our phones and we are always willing to assist in whatever means we can.

For far too long product developers have been listening to the market through the ears of manufacturers. The voices of the users, the installers, the safety managers and building owners seem to have been lost in the wind.

Bettersafe International are doing things differently. We are listening.

We work alongside development partners to ensure that the products we deliver you are already field tested and designed for the market into which they are being placed. We offer a product developed for the market into which is to be used, and we price it to win. Simple as that.

ISO 9001
Quality Management System

ISO 14001
Environmental Management System

ISO 45001
Health & Safety Management System

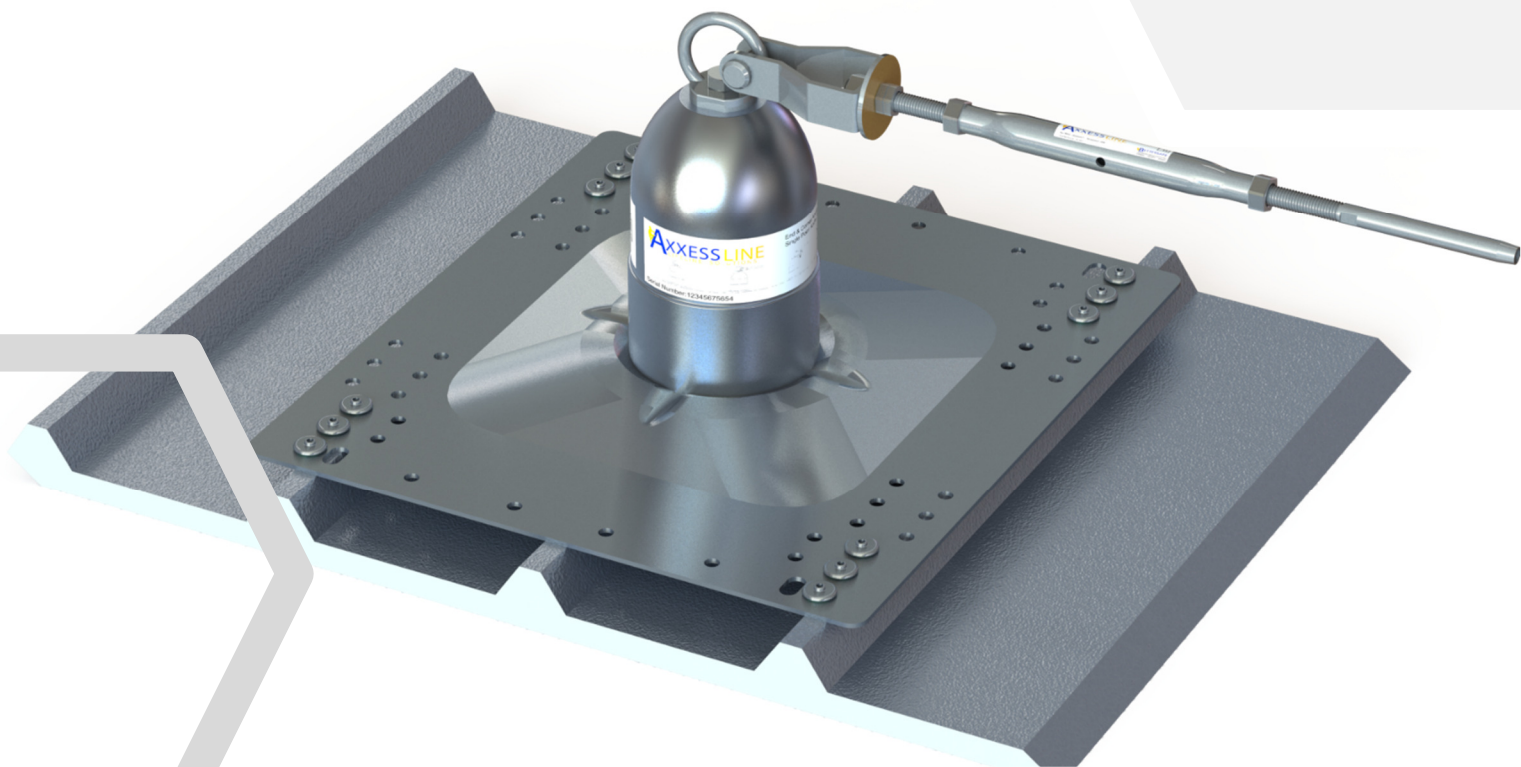

The System

- Reduced waste, reduced install time, increased productivity
 - Components are already installed in the factory saving approx. 5 minutes per post on site,
 - Minimal packaging saving disposal time and cost on site.
- Fully tested and certified
 - Independently tested by SATRA to EN795:2012 Type A & C. and CEN/TS 16415.
- System critical components are serial numbered.
 - Our extensive testing procedures are designed to be in excess of the requirements of the standards.
